Office Action Summary	Application No. 10/692,457	Applicant(s) MOON ET AL.	
	Examiner Allan Olsen	Art Unit 1763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 4-9 of U.S. Patent No. 6,706,200. Although the conflicting claims are not identical, they are not patentably distinct from each other for the following reasons.

The principle difference between the claims can be seen by comparing steps b and I of the patented claim 1 to steps b and I of pending claim 1.

Claim 1 of 6,706,200 includes steps a-w. Steps b and I are replicated below:

Claim 1 b) recites:

"forming first and second silicon oxide layers on said injection and ejection surfaces of said substrate, respectively;"

and step I) recites:

"coating a second photoresist layer on said second silicon oxide layer".

In contrast, pending claim 1, step b) recites:

Art Unit: 1763

"b) forming a first silicon oxide layer on one of said first surface and said second surface of said substrate".

And step I) recites:

"forming a second silicon oxide layer on the surface opposing said one of said first surface and said second surface, and coating a second photoresist layer on said second silicon oxide layer".

Therefore, the second silicon oxide layer that is provided in step b) of the patent is not provided until step I) in the pending claims. However, it is noted that there is no limitation regarding the order in which the steps are carried out. When step g of pending claim 1 is carried out immediately after step b, one can readily see that there is little, if any, substantive difference between the two sets of claims.
